XI2000

Home Cinema Projector

4K UHD True 8.3 Million Pixel Performance for Perfect Pictures with Subtle Details

XI2000 harnesses the advanced DLP 4K UHD DMD with 2716 x 1528 (4.15 million) micromirrors to achieve 4K UHD specification, utilizing XPR fast-switching technology via dual-position precision optical actuator with state-of-the-art image processing to double the resolution, reaching 3840x2160 with 8.3 million distinct pixels for each frame, four times the resolution of Full HD 1080p.

Sophisticated 4K-Optimized Lens System for Pure Clarity

With class-leading lens architecture, XI2000's optical engine is specifically designed for spectacular 4K image quality, offering True Zoom function and presenting the best viewing quality with flawless optics.

6-Element Lens With Extra Low Dispersion Coating

PHILIPS ColorSpark HLD LED technology for a New Level of Brightness and Wider Color Gamut

Compared with current LED technology, the revolutionary Philips ColorSpark HLD LED technology provides a wider color gamut, generates up to 3X brighter front-of-screen performance. Achieving 2,200 lumens for use in bright environments. Coupled with 20,000-hour long maintenance-free lamp life, XI2000 delivers long-lasting cinema enjoyment with new LED technology for both powerful brightness and breathtaking color gamut.

ColorSpark

Superb DCI-P3 Color Space for Unmatched Digital Cinema Experience

The combination of ColorSpark HLD LED technology and proprietary BenQ CinematicColor Technology accurately reaches the superwide DCI-P3 color range, significantly greater than the Rec. 709 HDTV color gamut. As defined by the American film industry, DCI-P3 provides far more colors covering a significantly larger portion of the visible spectrum for vibrant cinematic color performance unattainable with lesser color specifications.
